Basic EVE Commands

This section briefly describes the most commonly used EVE commands.

Command	Function
Bottom	Moves the cursor to the end of the current buffer.
Change Mode	Changes the current mode of the buffer.
Do	Allows you to enter an EVE command. You must use the DO key.
End of Line	Moves the cursor to the end of the current line.
Erase Start of Line	Erases all characters to the beginning of the current line.
Exit	Leaves the EVE editor and saves your current buffer. You can also press CTRL/Z.
Fill Paragraph	Reformats the current paragraph to fit between the left and right margins.
Find	Searches for a string in the current buffer.
Help	Provides help on EVE commands. Press the HELP key or the PF2 key on the keypad to get help on EVE keys.
Include File	Appends text from the specified file at the current cursor position.
Insert Here	Use with the Select and Remove commands to copy or move text. Selected text is inserted at the current cursor position.
Next Screen	Pages forward through the current buffer.
One Window	Enlarges the current buffer to a full screen display.
Other Window	When viewing two windows, moves the cursor from one window to the other.
Previous Screen	Pages backwards through the current buffer.
Quit	Leaves EVE without adding the note to the conference.
Remove	Removes text highlighted with the Select command.
Replace	Lets you substitute one word or phrase for another.
Select	Begins a selection of text to be copied, moved, or removed.
Spell	Invokes DECspell, an optional product, which lets you correct spelling errors.
Start of Line	Moves to the start of the current line.
Top	Moves to the beginning of the current buffer.

VAX NOTES

Quick Reference Card

Getting Started Commands

Command	Description
Notes	Invokes VAX Notes.
Help	Displays online HELP for VAX Notes commands. Press the PF2 key to display the keypad layout.
Directory/Conferences	Displays a listing of available conferences on the current system (node).
Add Entry	Adds a conference to your Notebook.
Open	Opens a conference in your Notebook so that you can read notes in that conference.
Directory	Lists topics in the currently open conference.
Read	Displays the text of a note. You can also read a note by typing only the note number at the Notes> prompt; you do not have to type the Read command.
Reply	Puts you into an editor so that you can type a reply. You must be reading a topic or a reply to use this command.
Write	Puts you into an editor so you can add a new topic to the currently open conference.
Print	Prints notes.
Close	Closes the currently open conference, and returns you to your Notebook.
Exit	Ends your VAX Notes session.
